2011-12 CEPS Graduates Continuing Education Report.....	30
Graduate School Summary 2011-12.....	31
2011-2012 Graduate School Employment Report .....	32
Historical Summary - 2009-10 to 2011-12 Academic Years.....	35

The data summarized in this report were gathered on-line from graduates of UW-River Falls who matriculated following Fall, Winter, Spring and Summer sessions. Data gathering for Fall 2011 graduates began in February of 2012 and data gathering ceased in November with surveys sent to Summer 2012 graduates. All graduates received an initial mailing and at least two reminders. Non-respondents were included in email requests for information in subsequent surveys. For instance, Fall 2011 graduates who did not reply to surveys sent in February and March of 2012 were included in emails sent in June and July to Spring 2012 graduates. The overall response rate was 30 percent (433 responses from 1,424 total graduates), which is 10 percent better than the response rate for the 2010-11 academic year.

As the following table indicates, this number of responses is expected to provide estimates that are accurate to within plus/minus 3.9 percent for all UWRF graduates.

There was substantial variation in response rates by College, ranging from a low of 25 percent for CEPS and to a high of 36 percent for CAS. Graduate students responded at a higher rate (38%) than did undergraduates. The following table indicates that the reliability of the estimates for most of the Colleges/School is not high and results at the individual program level would be much less so.

College/School	Graduates	Responses	Response Rate	Confidence Interval
UWRF – Overall	1,424	433	30%	3.9%
CAFES	292	75	26%	9.8%
CAS	547	166	30%	6.4%
CBE	196	71	36%	9.3%
CEPS	206	52	25%	11.8%
Graduate School	183	69	38%	9.3%

Because the response rates to this survey have been relatively weak, in this year's report we have created an additional summary table that compiles survey results for the 2009-10 through 2011-12 academic years.

In the employment summaries to follow, you will see a column of numbers. A "1" means the respondent reported being employed and a "2" means they reported that they were still looking for employment. In some instances, a respondent indicated they were employed but provided no further information. For those reporting a "2" that is all the information received from them. In one instance, to save space, three unemployed respondents are indicated by 2,2,2.

## Summary – All Graduates 2011-12
