Mr. Ronald M. Robinson
Vice President and General Manager
Electronic Equipment and Tube Department
Canadian General Electric Company, Ltd
830 Lansdowne Avenue
Toronto 4, Ontario, Canada

Dear Mr. Robinson:

I should like to express my appreciation to you for making Claude Watt available to us for a presentation to more than 100 individuals in the Instrument Department who are actively participating in product value improvement projects covering our entire line of instrumentation.

We asked Larry Miles to come to West Lynn and put on an inspirational and challenging program for our people as an aid in increasing the awareness of this type of work to the very survival of many of our product lines.

Larry wisely included Claude as one of several to share the program with him. We were all inspired to learn from Claude the accomplishments you had made to become competitive with foreign countries. He made a very real and interesting contribution to the program.

I hope that in some measure you were repaid for Claude's time by his opportunity to visit with the personnel of the Instrument Department working in his field.

Sincerely yours,

Edwin E. Parker
General Manager
