

Mr Akira Kodama, Secretary General. SJVE
IBAM
39-15 6-chome, Todoroki, Setagaya,
Tokyo, Japan, 158

Dear Akira Kodama;

Two events have taken place which may be important to you and to your associates.

First. Donald Parker, one of our top leaders in the use of Value Engineering Principles in the USA government in Washington, has, with extensive initiative and work, created a manual and an instructors guide which will be used in colleges along with our Techniques of Value Analysis and Engineering, 2nd edition to make good instruction practicable, even though the instructor may not be, himself, deeply trained in the techniques.

It is the most useful and remarkable work of its kind I have ever seen. It is just now finished, and is being shown to potential users.

Second. One of your countrymen, listed below, visited Mr Parker and bought a set. Presumably he has taken them back to Japan. Hopefully you and Professor Tamai, and perhaps Mr Ueno could arrange to see them.

They contain surprisingly complete lesson plans, tests, examinations, answers, reading assignments, reference and supplemental material, grading plans etc.

He is: Saburo Tamura B.E. NG
Assistant to General Manager International Division
Tajsel Corporation
Engineering and Construction
5 - 11, Ginza 2-chome, Chuo-Ku
Tokyo, Japan, 104

Phone Tokyo 567 - 1511, Ext. 654

My warmest Regards, and Wishes for Top Success,

Larry Miles

Jimmy,
He is the fellow
who bought the VE Theory
course:

3/30/77
10/31/77

The last
date he
visited me
