Hello Bob;

Real glad to see you in the Michigan Purchasing Seminar.

Keep up the good work.

For my class at UCLA, I need to have some concrete info on the use of VE in processes. I'm coming to you, preferably for a couple of case studies I might use. I'd like to have enough detail so it would be understandable, believable and usable to the managers who attend. From your work would you have any reports that could be available? Have you seen in the literature kicking around, and meaningful writeups, illustrations and examples? Certainly could use some of your good help.

Also need meaningful stuff on use in R&D, but am also asking others about that. If you have good references tho I can surely use them.

Warmest Regards,

Larry
