Dear Mr Yamada;

It was such a great pleasure to receive from Shigeo Takeuchi the pictures you snapped here at Sedgefield.

How much we enjoyed all of you!

And the pictures bring back the pleasant sights, pleasant food, pleasant people.

We do hope that your entire experience in the United States was both productive and pleasureable.

Eleanor is now busy preparing for another fine group of your countrymen - 18 gentlemen from Hitatchi. They will be here for cocktails and dinner on the evening of Sept 2. Then on the 3rd will return for a Value engineering Seminar from 10 to 15. Myself and Carlos Fallon will have the honor of lecturing and of advising them, during that period, with, of course a delighting lunch at noon by Eleanor.

Come and see us again.

Sincerely,

Larry and Eleanor Miles

cc to Takeuchi San - we much appreciated your arranging a visit from these fine gentlemen.

Dear Mr. & Mrs. Miles,

I am as grateful as ever to learn that each time Japanese value engineers visited the U.S.A., individuals or groups, they were not only given your expertise guidance in their professional areas but also invited to your home to receive your very warm-hearted hospitality in a really American "at-home" atmosphere.

Enclosed I am pleased to send you some photographs which were taken by Mr. H. Yamada of the Aishin Seiki Company, who was one of the participants of IBAM's VE group of March and April this year. I would much appreciate it if you could kindly acknowledge the pictures directly to Mr. Yamada at the following address:
