Dear Add:

The address by Admiral Morell at our Cleveland Convention certainly rang the bell.

We already have about fifty requests for copies of the talk and are wondering if your organization plans to reprint it for distribution.

In some of the companies carefully prepared and thought provoking statements such as those made by the Admiral are printed and given wide distribution and it may be that your organization has that in mind.

Of course, we plan to distribute about 150 copies to purchasing publications and the local associations but, apparently, that would not be sufficient coverage of this very fine address.

Very truly yours,

Secretary-Treasurer
