How to stop inflation

stop catching up

no increases of any kind for 90 days

Hardship - yes - otherwise disaster for everyone

Have no cuts in the value of our money

report the decreases in the value of our money instead of "inflation"

decrease in cents per dollar

Report for public use

wage increase - in terms of decrease in the \$ paid for wages

price increases - " " value of \$ required

don't add a govt bureau. shift from some troublesome worthless data

to this. have the same people handle it.

go without some things if we must

lead a movement

when directions are unclear that's time for a thrust

The problems right now are better under our guns than any other

Inflation offsetters

actually address the problems

decide exactly what we want to do

provide knowledge, creativity, judgement to that

apply them in a plan that provides deep rather than surface treatment

dig deep for knowledge don't be evaluating knowl as it surfaces

real creativity - no judding or stopping

List a lot of things to do

Realism acceptint the cold hard facts

Inflation never has and never will go away

We think were intelligent reason motivated decision makers still

our company and country leadership still talks about inflation

"going away" Never!

Va has caused some different things to be done - examples

can VA now spearhead making inflation for the first time in history

"go away"?

What can we do?

Teach facts

teach steps of action

get support onto handwagon

normally each man makes decisions from "here to there". In va go

back to whats basically important and make decisions from there.

use it all
