LMEE Department
JOHNSON CITY, NY

We are pleased that Dusty Fowlkes' presentation brought value to your area.

Disseminating information concerning about 600 or 700 "Specialties" in a way that it will be recalled and used when needed in all of our drafting areas, methods areas, design engineering areas, purchasing areas and some others is a job we don't yet know how to do but are trying to get organized.

L. D. Miles
Manager - Value Analysis

E. D. Miles, Manager
Value Analysis
Manufacturing Services
Building 327
Schenectady Works

Mr. J. K. Fowlkes of your staff recently gave a very excellent presentation on Value Analysis at our Johnson City Plant. The talk was well organized and made effective use of "before and after" examples. Following the talk, a number of our engineers commented that it was well worth listening to.

Mr. Fowlkes' presentation will also serve to further publicize the activities of our Value Analysis Operation, under Mr. A.A. Hoffman, which already are receiving such favorable attention at this facility.

R. A. Edison
