West Lynn Works, January 14, 1954

Mr. C. W. Bryant
 Materials Services Dept.
 SEBECTADY WORKS

The Value Analysis Symposium at West Lynn last Tuesday was apparently very successful. I have received a large number of reports from the people attending ranging from "Extremely interesting" and "Most inspiring" to "The most worthwhile two hours I ever spent." The only criticism or suggestion has been one voiced by a number of people that we should have had more representation in the audience from planners and others in Manufacturing Engineering.

Many thanks again to you and Larry and Roy for the excellent job you did. It was apparently a highlight in West Lynn engineering activities.

J. D. Thompson - Supervisor
 Product Engineering Administration
 Meter & Instrument Department
