DATE _____ SUBJECT _____

Was GREAT being with you and Betty a couple of days again.

Altho perhaps too late for your immediate needs, I'll jot a few thoughts
your question generated.

Re: Benefits of the VA/VE principles to business

As time and motion and similar studies during the past 50 years increased
the productivity of blue collar people,

VA/E increases the productivity of the white collar group

Secures more useful results from each employee/hour.

Secures valuable results which could not be achieved by those same
people otherwise.

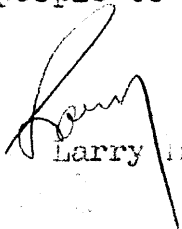

Helps tell exactly the right problem for them to work on.

Causes deep searches for essential knowledge at exactly the right time
in the thinking process.

Brings essential Creative Thinking, under the right conditions, at the
right time, and to the right extent.

Total Function and fact emphasis often welds diverse personalities with
diverse fields of knowledge and expertise into a "one objective" working
team. Often causes thinking and decision people to discard very much
present but out dated approaches.

Sincerely,

Larry Miles
