R.R. Person
Manager - Manufacturing

Dear Bob:

This is to inform you that my resignation from the Insulator Department of General Electric Company will be effective June 1, 1957.

It is with mixed emotions that I tender this resignation; however, I do feel that the opportunity that has been offered to me with Conover-Mast Publications has good long range potential in the kind of professional endeavor to which my particular talents are best suited.

I would like to take this opportunity to express my appreciation to you, to Paul Hartig and others on his staff for your encouragement and assistance during my present assignment with Larry Miles in Value Analysis.

Sincerely,

C.B. Francisco

Larry -

There are no words to express my admiration, respect and genuine fondness for you, through whom the real opportunities, challenges and understanding have come to me within, and now without General Electric.

If this letter is not required for any formal significance, I hope that it may rest among your personal archives, - there to hold in a spiritual significance for me the reminder that I don't know his name.
