Mr. Lawrence D. Miles
Manager-Value Analysis
Manufacturing Services
Bldg. 32G
Schenectady

Dear Larry:

The success of Specialized Technical Education depends on the cooperation of the Product Engineering Function in providing technical authorities to contribute in the areas of both course and instructor development.

General Electric is fortunate in having available, in the numbers and competence required, technical authorities to contribute to necessary technical education. The result of their work is reflected in improvement of established courses, in development of new courses, and in development of instructors to teach these courses. This year, Company technical authorities have made major revisions in existing courses, assuring that they contain the latest advances in technology. New Specialized Technical Courses have been made available. A highly inspirational and successful Seminar was conducted last week at Syracuse University, representing an instructor development activity to advance technical education within the Company.

Mr. E. K. Von Fange of your Department has made a substantial contribution in 1958 by participating in development of instructors to teach, "Creative Approach". While we recognize this work required much of his own time, we also realize that this contribution is supported through the cooperation of your organization. Mr. Von Fange has received a letter complimenting him on his contribution (copy attached). May we take this opportunity to thank you and your organization for your cooperation and contribution.

Dick

Your contribution in 1958 to Specialized Technical Education assures the availability of important educational activities for qualified technical personnel. We feel that the impact of your work will be recognized by all of our progressive Product Departments and Laboratories who continually strive for improved technical competence.

We know that your accomplishments, in the areas of both course development and instructor development, required much of your own personal time, contributed in a true professional attitude. May we take this opportunity to acknowledge our appreciation of your contribution.
