Dear Larry and Eleanor,

I know this is very belated, in apologising for not being able to visit you on my last trip to the States. But better late than never!

I will be at the SAVE Conference again this year and look forward to meeting you again.

I have just had the most interesting experience of analysing a problem-area by "ANTI-FUNCTION" Analysis - and it worked like a charm. We'll talk about it when we meet.

Best regards,
Yours sincerely,

Keith van Heerden.

Keith
