THE PRESIDENT'S REPORT

Recent activities of the WMAA have included the traditional Fall Homecoming Meeting on November 9th in Madison and the Pacific Northwest Alumni gathering in Portland, Oregon on December 1st. The Fall meeting was highlighted by the introduction and remarks of Dr. Robert C. Hickey, new Chairman of the Department of Surgery. A brief and interesting scientific program was followed by a social mixer during which faculty, alumni and senior medical students participated.

The reports from Portland indicate that their regional meeting was very well attended by an enthusiastic group of Northwest alumni. This meeting signals the need for expanding the scope of our activities on both a local and national level.

A report on the present status of the Medical Library project was presented at the Fall meeting.

I am happy to report that the divergent opinions of the Library Staff, University Librarian and University Architect have been reconciled within the framework of the recommendations of the library consultants. In addition, a new architectural firm has been appointed to proceed with final plans. The decision to proceed with all possible speed was made regardless of the availability of federal matching funds—decision which the Medical Alumni have encouraged for some time. With this background, plans for construction should be forthcoming in the near future, and a bona fide ground-breaking an integral part of one of our Alumni Days before long!

Respectfully,

Phil Bland, '47

CONVERSATIONS

It was the annual Fall Meeting, Madison, November 9th.

"What's Phil Bland doing: selling Olympic buttons for the Westby ski meet?"

Dr. Bland came over moments later to mention that Ronald Mackenzie, '53, would be at the meeting. We were pleased to hear this. Our last word of Dr. Mackenzie (See Autumn issue) was that he had contracted a hemorrhagic fever while doing research on the disease in La Paz, Bolivia. He has been with the U. S. Public Health Service, working out of the Canal Zone for the past two and a half years. Dr. Mackenzie showed up shortly, looking extremely well.

"Are you immunized now?"

"That remains to be seen. We don't know", he said.

He and his family would be returning to Central America shortly. Incidentally, Dr. Mackenzie and Dr. Bland are cousins.

"I'll go up to Westby for a few days, then to some meetings in Chicago." Some former classmates came by and there was another warm reunion under way.

Dr. Robert Hickey was introduced to the Alumni Meeting. The new head of surgery made a few brief informal remarks, indicating a great future for the department.

"In addition to a seasoned, skillful group of mature surgeons", Hickey declared, "we have a brilliant group of younger men second to none in the nation". He means it, too.

Dr. Eichman, Director of Student Health spoke. He raised some interesting questions of reciprocity as regards the records of students at the University. "Sometimes the records sent us from the family physician are inadequate and fail to mention important medical history. In turn, we are prepared to send information of the student's four year medical record at the University back to the family physician. We need a reciprocal working arrangement."

Several alumni mentioned Dr. Eichman's remarks

later; thought they had much merit and that there should be a follow-up.

A rather fascinating three dimensional film was shown during his scientific talk by Dr. George Rowe.

The social mixer was held in the Student Lounge with several seniors present. The youngest alumnus present: Homer Carter, '13. Dr. Salter in all the way from Stockton, California. He is a very active alumnus who played an important role on the coast during the library campaign.

Someone asked Homer Montague how he remembered so many names of returning alumni.

"I remember only those I had fights with", the photographer replied, tongue-in-cheek (?).

"I believe you're Dr. Bachhuber from Green Bay", someone said. Dr. Bachhuber, in turn:

"I'm not that Dr. Bachhuber. I'm Dr. Bachhuber from Kaukauna."

"And isn't there a Dr. Bachhuber in Portland, Oregon."

"There is. He's my nephew."

It has been raining outside most of the morning. Suddenly there were extra tickets to the football game. The rain ceased and by one o'clock the sun broke through. Wisconsin took Northwestern. The season could have ended then and there. It didn't. Wait 'til next year.

Northwest Alumni Meet

A happy gathering of alumni members in the Pacific Northwest took place on December 1st. The Portland, Oregon "chapter" of the Medical Alumni Association played host for the regional meeting held at the same time as the Clinical Session of the AMA. Dr. Gerald Schweibinger, '48, served as program chairman and spent weeks preparing for the successful reunion. As of press time, we do not have the roster, but have been informed that forty alumni members registered for the reunion. This included a good representation from the beautiful state of Washington ("Roll on, O Mighty Columbia . . ." says a song that comes to this reporter's mind suddenly. The Columbia rolls on at the beautiful Washington-Oregon border and ends a 1400 mile journey at the Pacific.)

Dr. Edgar Gordon, Professor of Medicine presented the group with a "State of the Union" type report, an assessment of the present status of the problems and progress at the Medical School. Dr. Gordon illustrated his talk with color slides of the campus, taken only a week prior to the meeting. Included were shots of the new buildings and portraits of new faculty and recently appointed administrators including Dean Crow, Dr. Hickey, Dr. Cameron (Heads of Surgery and the Isotope Service, respectively), Mr. Hawley and Mr. Connors. Also present from Madison were Drs. W. D. Stovall and Ralph Campbell. Dr. Stovall told the *BULLETIN*, "I went to offer encouragement". He did, too. Called upon, he said

briefly to the meeting group, "the Medical School's respiration is regular, pulse rate normal. There are no upheavals, activity is normal and everything is moving ahead in orderly fashion . . . and that is the condition of the old lady in the shoe . . ."

Dr. Gordon also presented some of the long range goals of the Medical Center. The entire affair was, of course, warm and informal. Alumni in the Northwest expressed a deep and abiding concern for the Medical School's welfare. The alma mater is close to the heart. The meeting had the largest attendance of any alumni function ever held in the area.

Roll on, Columbia . . .

Oregon Letter

Portland, Oregon

Wisconsin Alumni Bulletin:

Enclosed are some pictures of the alumni members present during the meeting at the Congress Hotel in Portland on December 1st.

The evening was spent first in an informal gathering with cocktails, followed by a presentation of the growth and development of the Medical School as well as some of its internal activities, given by Dr. Gordon. There was a question and answer period and I believe everyone was pleased and satisfied with what they saw and heard.

It was the general feeling of those of us who are more than two thousand miles away from our medical school that this was a most gratifying experience and we were pleased that the Medical Alumni Association Headquarters gave so much time and interest to making this meeting a success.

Dr. Gordon was indeed stimulating and we were pleased to have such men as Dr. Campbell and Dr. Stovall to help arouse fond recollections.

We hope there may be many other such enjoyable meetings.

Sincerely,

Frank Perlman, '33 (Signed)

ALUMNI BOARD ACTION:

In their last meeting before we went to press, the Board of Directors of the Medical Alumni Association unanimously approved a contribution of \$2,000 to the University to support research and writing for a History of the U.W. Medical School. The Board also approved the plans and general format for Alumni Day, '64, details of which will appear in our Spring issue.

Drs. Stovall, Gordon, Perlman, Bingham and Campbell

Mrs. Bingham, Dr. Gustavson, Mrs. Gustavson, Dr. and Mrs. Bachhuber

FACULTY NEWS

Dr. Nathan Smith has resigned as chairman of the Pediatrics Department. Professor Smith cited two reasons for his action: Firstly, a belief that a department is better off if one chairman does not serve too long, so that there can be a succession of new ideas and reassessments; secondly, a desire on his part for more time to teach, do research and clinical work. In accepting the resignation, Dean Crow said that, although he regretted the loss of Dr. Smith's services as chairman at this time, he agreed with the principles and was understanding and sympathetic with Dr. Smith's desire for more time for his own scholarly activities.

Dr. Smith is currently in Santiago, Chile, spending an eight month period there as part of a faculty exchange program with the University of Chile. He will be helping to set up a hematology laboratory and will do research in nutritional anemias. (Professor Julio Meneghello has been in Madison the first semester from the Department of Pediatrics at the University of Chile.)

Dr. Charles Lobeck will serve as Pediatrics chairman for the remainder of Dr. Smith's term. Dean Crow nominated Dr. Lobeck after having received an advisory ballot from members of the department.

Dr. Albert Evans, Chairman of the Department of Preventive Medicine, has been selected to work with the World Health Organization this coming summer. He will travel to the Philippines and assist that country's health department in the reorganization of its national laboratory system.

Dr. James Cherry has been elected Fellow of the American Academy of Pediatrics.

Dr. Robert Roessler left the faculty here this month to accept a position at Baylor University College of Medicine in Houston, Texas. He had served as chairman of the psychiatry department.

Of Roessler's resignation and the earlier announcement of Dr. Carl Roger's move to California, Dr. Milton Miller, Chairman of Psychiatry, said, "academic comings and goings are not infrequent, yet these departures represent special losses to us". Dr. Miller cited a number of major significant contributions which these two men made to the Medical School and to their fields. "Both Dr. Rogers and Dr. Roessler deserve the satisfaction of knowing that they leave Wisconsin greatly enriched through their efforts."

A major organizational change has been effected.

The Medical Center was consolidated with Acting Dean James Crow being given the additional title of Acting Director of the Medical Center. When a permanent dean is announced, his title and responsibilities will cover the Medical Center, including the School of Medicine. President Harrington indicated earlier last Fall the importance of this organizational step in helping to recruit a new dean as well as facilitating the job of the dean. As part of the organizational change Edward Connors was named Assistant Director of the Medical Center, and Ralph Hawley was named Business Manager and Secretary of the Faculty of the Medical Center.

Dr. John Cameron of the Department of Radiology has played an important role in helping to develop a radiation meter which makes it possible for cancer radiologists to learn the exact amount of intensity of radiation being beamed at a treatment area. Invention of the meter came about as a result of basic research by Professor Cameron and Professor Farrington Daniels. Their discovery of the thermoluminescent properties of lithium fluoride powder, which has been exposed to radiation, preceded the development of the meter.

Dr. Nikolaus Mani will join the faculty this summer, teaching courses in the History of Science. Professor Mani has been at Basel University in Switzerland.

The Nekoosa-Edwards Foundation, Inc. of Plover, Wis., granted \$60,000 to the Medical School for support of research, fellowships and trainees. (We have just received word of the passing of John E. Alexander, chairman of the Board of the Nekoosa-Edwards Paper Co. He was 69. Mr. Edwards has been an active supporter and close friend of the Medical School.)

Dr. Clinton Woolesy, Director of Neuro-physiology Lab, has embarked for Santiago as part of an exchange program with the University of Chile.

A new and expanded Radiotherapy Center has been opened at the Medical School. The Center was formally opened on December 16th. Dr. Halvor V. Lund is director of the Center which contains a 5,000 curie cobalt 60 teletherapy unit; a 2,000 curie cesium 137 teletherapy unit; a one million volt X-ray therapy unit; a 250 kilo-volt X-ray therapy unit and a special room for a high energy dual-beam betatron.

Dedicate Kennedy Lab

R. Sargent Shriver, Mrs. Patricia Swan, Dr. Waisman, Senator Kennedy and Governor Reynolds.

In the battle against mental retardation, researchers have been paying increasing attention to the chemical causes of brain damage. One of the many important research efforts around the country, and one of several efforts at the Medical School, is that involved at the new Joseph P. Kennedy, Jr. Memorial Laboratories. The facilities were dedicated in impressive ceremonies on November 20th. The laboratories are supported in part by a grant from the Kennedy Foundation. It is named after the late President Kennedy's oldest brother who was killed in action during World War II.

The director of the laboratories is Dr. Harry Waisman, '47, Professor of Pediatrics. During the dedication, members of the Kennedy family toured the laboratories which are located on the new top floor of Children's Hospital. At afternoon ceremonies, significant papers were presented by U.W. Medical faculty members and by other eminent researchers

from throughout the nation dealing with factors relating to retardation.

Representing the Kennedy foundation were R. Sargent Shriver, Peace Corps Director and Senator Edward Kennedy.

Presenting papers were Drs. David Smith, Theo Gerritsen, Raymond Chun and Harry Waisman of the U.W. Department of Pediatrics; Dr. Richard Masland, Director, The National Institute of Neurological Diseases and Blindness, Washington, D.C. and Dr. Julius Richmond, Chairman of the Department of Pediatrics at the Upstate New York Medical Center.

The papers offered during the afternoon symposium related to "Medical Aspects of Mental Retardation".

ALUMNI CAPSULES

William Nuesse, '62, a captain in the U.S.A.F., recently moved from Duluth, Minnesota. He is now with the 867th Medical Group, Box 2987, APO 864, New York, N.Y.

* * *

Glenn Baumblatt, '55, has moved from Toledo, Ohio to Youngstown where he is entering a partnership in Internal Medicine with Dr. David B. Brown.

* * *

Dr. Wilbur W. Bartels passed away on July 23rd, 1963, it was recently learned from his widow. He served his Orthopedic residency here. At the time of his death he was Chief of Orthopedic Surgery at the VA Hospital in Lincoln, Nebraska.

* * *

Alan Goodsitt, '63, was back in Madison recently for a short visit. He is interning at the New York Upstate Medical Center in Syracuse. Dr. Goodsitt will begin a residency in Psychiatry this September at Michael Reese Hospital in Chicago.

* * *

Jon Anderson, '60, is "pleased" to inform us that he has recently completed two years of active duty with the U. S. Navy. He is now in General Practice in Wausau, Wisconsin with Drs. Stevens, Hammer and Kass.

* * *

John W. O'Neill, '43, died on November 30th in Boulder City, Nevada. Dr. O'Neill was associated with the Atomic Energy Commission project at Mercury, Nevada at the time of his death. He is survived by his wife, a daughter and four sons.

* * *

A Milwaukee physician, Dr.

Claude F. Schroeder, '33, passed away recently. He had been affiliated with the Jackson Clinic in Madison until 1960 when he moved to Milwaukee where he became an allergy specialist on the staff of the VA Hospital at Wood, Wisconsin.

* * *

Richard Wallrich, '56, would like to get the locations of old friends. Dr. Wallrich is in the U.S. Army Medical Corps and was promoted to rank of Major a year ago, serving as Chief of Dermatology at the Army Hospital in Fort Ord, California. He is planning to return to private practice in the near future and locate in Santa Rosa, California. Since leaving Madison in '56, the Wallrichs have welcomed three additions to the family: Betsy Ann 6½, Reed Young 2½ and Bradley John 1½.

* * *

The Medical Library has received a collection of twenty early 18th century medical books from John F. Moon, '24.

* * *

A memorable book, recently published, has arrived at the library. The Book, **MODERN PERSPECTIVES IN CHILD DEVELOPMENT**, honors Milton Senn of the Yale Medical School. Dr. Senn, '27, received the Wisconsin Medical Alumni citation in 1961. The work is published by International Universities Press. Its editors are Albert Solnit and Sally Provence.

* * *

Martin Fliegel, '50, is the Superintendent of the new Children's Treatment Center facility in Madison. Dr. Fliegel assumed the responsibility when the Center first opened in 1962. He also holds a clinical appointment in

Child Psychiatry with which the Center has close ties.

* * *

'62 class representative Charles Miller, stopped in the office recently. He is preparing an annual newsletter for and from his class. He does not have the latest addresses of some of the class. Please let us know your latest address.

* * *

John Grinde, '35, unofficial poet laureate of the Alumni Association, has done it again. A year ago we published his delightful poem, **Venus**, which drew considerable comment. Dr. Grinde was subsequently the 1963 convention chairman of the National Federation of State Poetry Societies (reported here last summer). Now, his art work has appeared in a Madison, Wisconsin newspaper (The Capital Times). A sketch by Dr. Grinde of one of his DeForest, Wisconsin neighbors was used by the newspaper to illustrate their story of the man. (The subject of the piece is a patient of Grinde's and had bagged a deer in spite of the fact that he is armless. Hats off again to John Grinde, poet, artist and fine physician.

* * *

A postscript to the Fall Homecoming meeting involves Eugene Weston, '55. The Westons flew into Madison on Homecoming day. The weather was horrible for flying with a 500 foot ceiling at Truax Field. After circling for some time, the plane headed for Detroit to wait for visibility to improve in Madison. Finally, 12:30, they landed in Madison with just time to get to the game missing the meeting that morning. The flight back to Colorado for the Westons was less hectic.

INTRODUCING DR. STROMINGER:

Pharmacology Chairman

Dr. Jack L. Strominger has assumed the chairmanship of the Department of Pharmacology. He comes to the Medical School from Washington University in St. Louis where he was Professor of Pharmacology and Microbiology. He has a distinguished teaching and research career and is particularly well known for his studies on the bacterial cell wall, as well as for his contributions to understanding of the action of penicillin on the bacterial cell. Dr. Strominger is the author of over ninety articles and books in his area of work.

A native of New York, Dr. Strominger received his A.B. degree from Harvard in 1947 and his M.D. from Yale in 1948. He is 38 years of age. From 1951 to 1954 Dr. Strominger was the senior assistant surgeon for the U. S. Public Health Service at the National Institute of Arthritis and Metabolic Diseases. The following year he was a Fellow of the Commonwealth Fund, doing research in Copenhagen's Carlsberg Institute and at the Molteno Institute in Cambridge University, England. He was also a Markle Scholar.

Among other honors, Dr. Strominger has received the John J. Abel Award in Pharmacology, Paul-Lewis Laboratories Award in Enzyme Chemistry and in 1962 a U. S. Public Health Service Career Award. He serves on the editorial board of the *Journal of Pharmacology and Experimental Therapeutics*.

In addition to serving as Chairman of Pharmacology, Dr. Strominger will be a member of University-wide committee on the development of a Laboratory of Molecular Biology.

The Stromingers have four children.

Dr. Strominger

A NOTE

Humanity asserts itself in many ways. After a football game at the stadium in Madison, one knows how humanity asserts itself by inching, perhaps pushing and working itself through to cars, bars and post-mortems. The University of Wisconsin Marching Band marches over the campus on its way to the School of Music, colors bright and music crisply smacking the Fall air. The band passes through the University Hospitals, going right past the Children's Hospital. There, the band always pauses and offers a joyous concert to wide-eyed youngsters. For them, the band offers more excitement than the game. And after each game, the band is faithfully there, pausing and performing. Humanity asserts itself in many ways.

CALIFORNIA CORRESPONDENT

By William Oatway, Jr., '28

Richard Jacobsen, a former resident in Urology (1938-41), is doing well in his Pasadena practice. His beauteous wife, Helen, was from Wisconsin General. They have two children. . . . *Robert Watson*, '38, has a fine Pediatric practice in Pasadena. He is very active in civic affairs. Bob has recently helped collect funds for the Elvehjem Memorial Art Center. He and his wife, Gladys, have one child. . . . *Harold Younggreen*, '41, (resident 1945-48), is in the practice of Internal Medicine in the heart of Los Angeles. He is on the staff of several hospitals. Harold and Lucille have three children.

The memory of *Stanley Edwards*, '35, is still fresh among his saddened friends. He died in 1962 of an acute self-diagnosed aneurysm of the brain, and left his wife, two children and a host of dependent patients who miss his drawl, his dry sense of humor and his constant friendly assistance.

George Kalman, '57, is just out of the service and living at 641 Ocean Park Blvd. in Santa Monica. He is completing his training in Psychiatry, keeping an eye open for a place to practice. Mrs. Kalman, also an M.D., graduated in '55. The Drs. Kalman have two children. . . . *Gene Adashek*, '36, was interviewed in Los Angeles recently. He looks precisely as he did about 1940 (plus a slight gloss from the area where he practices surgery—Beverly Hills). He is still Consultant and Medical Director for the American Red Cross Blood Bank of Los Angeles, and does an excellent job of community service. Gene interned Wisconsin General in '37 and finished a surgical residency in '41. He has two children.

C. Richard (Dick) Smith, two-year graduate of Wisconsin in '23 (though the old directory says '32), is now the founder of two clinical laboratories in Los Angeles. He is the leading mycobacteriologist in the area and one of the foremost in the world. His blond curly hair is gone, but his slow, precise manner of speaking is the same. He is just as coherent and sagacious. Dick and his wife Ida have a daughter, Stephanie. The Smiths live on the Barlow Sanatorium grounds. . . . *Betsy Owen Steele*, '35, retired from practice after finishing a residency in Pediatrics and marrying Dr. John Steele. They lived in Milwaukee until 1956, when John became Chief of Surgery at the San Fernando VA Hospital and a professor at UCLA. They live in Northridge and have four chil-

dren: Kit, Polly, Wendy and Jenny. Betsy is the sister of Merle Owen Hamel (class of '36, intern '37) of Madison. Betsy and John collaborated on several volumes of the *John Alexander Monograph* series on surgery of the chest. They are also noted hosts and far-ranging fishermen.

Bertrand Meyer, intern in '41, surgical resident in '49 (after several years in the Pacific with the Wisconsin based hospital group), practices in Los Angeles. Bert is a chest surgeon with John Jones in a fabulous practice (lung-heart-vascular). He is co-author of several articles, on the staff at USC and associated in the production of numerous TV and movie shorts on heart surgery. He is one of the most sound and hard-working people in the field. His wife Florence is a life-master bridge player. The Meyers have four children and reside in La Crescenta. . . . *John Urabec*, (two-year man, '33), has practiced in the Los Angeles area since he finished medicine in Pennsylvania. He is renowned as a pulmonary disease specialist. John also serves as chief consultant for the Industrial Commission. He is a collector of rare and valuable books as well as a grower of prize carnations. He looks much the same. John and spouse Margaret live in Flintridge Hills.

This column is not large enough for even the major facts concerning *Chauncey Depew* ('Sarge') Leake, now returned to the Department of Pharmacology at the University of California, San Francisco. He graduated from Princeton; took a Masters ('17) and PhD ('23) from Wisconsin. Sarge was an Instructor in Physiology from 1919 to 1923; also the youngest man on the faculty to have a 'William Snow Miller interest' in medical history. From 1923-28 he was an Assistant Professor in Pharmacology. From '28 to '31 he was a professor at California after which he became vice-president for Medicine at the University of Texas. In '55, the peripatetic Sarge shifted to Ohio State as Professor of Pharmacology. He remains there until '61 when, full circle, he returned to California. Sarge has dozens of honors, honorary degrees and club memberships. He has been president of such groups as the History of Science, American Society of Pharmacologists and is the author reports and translations. He is responsible for a brief review of medical literature called, "*Calling Attention: To Post or War*"

(continued on next page)

California Correspondent - -

(continued from page 10)

asket as *You Wish*". It contains one sentence, one
me and one idea about dozens of current papers in
hundreds of fields. For those who like brevity, ver-
atility—and Sarge, we can report that he is busy
and happy.

Jack Pyre, native Madisonian who graduated in
57 (later served in Student Health Service), is a very
good and helpful Internist in Tucson, Arizona. He
has a new office on the periphery of this burgeoning
city. Jack and spouse have four daughters. He spends
as much time as possible hunting. . . .

Since we're jumping around the West, let's men-
tion James Bingham up in Seattle. He was a resi-
dent in Internal Medicine at Wisconsin from 1938-41
and an Instructor for one year thereafter. His wife,

Elizabeth, a former resident at Wisconsin, has been
temporarily out of practice following surgery. She is
mending and we wish her well. . . . Also practicing
in Seattle is Bill Leede. He is in the same medical
building constructed by Dr. Bingham and some eight
associates. Bill's wife and four children are well and
happy (he reported during a recent phone call from
the airport).

We westerners are sentimental when it comes to re-
calling halcyon days in Madison. We long to see
the changing face of the campus, the new medical
buildings, the old friends: Another alumni day is not
far off.

**(Californians! Send your news items to Dr. Oat-
way at La Vina Hospital, Altadena, California.)**

EDITOR'S REPORT

ON THE LIBRARY

The construction of the William S. Middleton Library has been a goal of the Medical Alumni for many years. Our organization gave body to this purpose and engendered the financial support of the medical alumni and friends outside the profession. The success of this effort gave reality to the dream, but procrastination and disappointment have been our lot. We have heard many explanations and justifications for the delay in construction. They are all plausible. HOWEVER, the William S. Middleton Medical Library remains a dream. We must not cease our prodding, lest our accomplishments bog down in the mire of further hesitation.

ON THE FALL MEETING

Hat's off to Frank Weston, '24, and his committee for a most enjoyable scientific program. We were happy to see the faculty well represented. The innovation of the mixer in the student lounge was a particular success. Some of the preceptors, attending another meeting the previous day, stayed on and visited with the alumni and senior students. We were pleased to see Dr. Robert Hickey, our new Chairman of Surgery, and to get to know him better. Joe Gale tells us the Surgery department has a dynamic leader and a great future—and we agree.

The football game was a proper topping to a delightful day.

ON AREA CORRESPONDENTS

We are pleased to report that Bill Oatway, our "California Correspondent", has been joined by Jackman Pyre, '37, who will serve the *BULLETIN* as our "Southwestern Correspondent". (Texans, New Mexicans, Oklahomans and Arizonans. Send your

news items to Dr. Pyre, 601 N. Wilmot, Tucson, Arizona.) Geographic distribution and distance are dissolved in our pages, for the *BULLETIN* aspires to be truly home base to all alumni. We will report to you as new area correspondents are added to our contributing staff. The more regional reporters, the less writing required of your editors!

ON FUTURE PROJECTS

Your Board of Directors is considering a number of future projects for the Alumni Association. These include:

1. An organization of class representatives to facilitate communication from alumni outside of the home state to the home state to the central body and augmenting their influence on the organization.
2. A History of the Medical School to be compiled and written while the men who made and lived the history can actively contribute their personal observations and reactions as well as priceless memorabilia.
3. Compilation of an Alumni Directory to be distributed to the members at biannual intervals.
4. Organization and support of local Wisconsin Medical Alumni clubs wherever residence concentration warrants.

Your comments on any of these proposals would be most helpful to the Board. Let's hear from you on these or other questions.

Your Editor,

Mischa J. Lustok, '35

SENIOR CLASS REPORT

By David Jaecks, Senior Class President

The topic of prime interest to seniors at this time is the selection of an internship. All applications have been submitted, the Dean's letters and the letters of recommendation have gone out. The die is cast. There now ensues an interval of expectant waiting until we receive our assignments in early March.

A half of the class recently participated in a week-long program on industrial and community health. This program was organized by Dr. Evans, Chairman of the Department of Preventive Medicine. During the week's program students were made aware of problems encountered in industrial and community public health and with both private and governmental agencies functioning in these areas. Another part of the program included what for many was our first visit to the State Medical Society. There we were treated to a fine lunch, introduced to the organization and activities of the Society.

The Medical School has obtained the use of the Wisconsin High School gym this year. It is available on evenings each week for use by students, housewives and faculty. Some hard fought basketball and volleyball games are anticipated. Hopefully, after Wisconsin High vacates the building, the gym might be acquired for permanent and more extensive Medical School use.

Harris Murley will make the Senior Class report in the next issue of the *Bulletin*. Seniors should drop their newsworthy items to him.

Editor's Note: Dave will be on his preceptorship at La Crosse during the next quarter.

Miami, Fla.

Dear Dean Crow:

I am giving myself the liberty of sending you for the library of the University of Wisconsin Medical School the Second Edition of my three volume *UROLOGY*. It was published this week by W. B. Saunders Co.

I left Madison more than forty-five years ago and have never seen the Medical School, my closest contact being a contribution to Bill Middleton's library. A visit is one of my not too-far-off plans.

Sincerely yours,

Meredith Campbell, '17 (signed)

(Editor's Note: Dean Crow wrote Dr. Campbell, thanking him for the gift and expressing hopes for his visit.)

MILWAUKEE WINTER MEETING

February 14th

University Club	Cocktails 6:00 PM
Milwaukee	Dinner 7:00 PM

Guest Speaker: Dean James F. Crow

Other Faculty Members

Will Be Present

Program Chmn.: Albert Martin

IN THE MAIL

Dear Sirs:

I thought you might be interested in a report of a gathering of former residents and staff of the University Hospitals held in conjunction with the San Francisco meeting of the American College of Surgeons on Wednesday, October 30th, 1963.

The following former residents and staff attended the meeting which consisted of a cocktail party and dinner at which time Dr. Robert Hickey, new chairman of the Department of Surgery, gave a short talk:

Dr. Walter Cain, Pittsburgh, Pa.
 Dr. and Mrs. A. R. Curreri, Madison, Wis.
 Dr. Richard Davis, New Richmond, Wis.
 Dr. Robert Johnson, Madison, Wis.
 Dr. John Keeley, Chicago, Ill.
 Dr. Donald Koepke, Madison, Wis.
 Dr. and Mrs. Ben Lawton, Marshfield, Wis.
 Dr. Kenneth Lemmer, Madison, Wis.
 Dr. and Mrs. David McGrath, Waukesha, Wis.

Dr. and Mrs. Sanford Mackman, Madison, Wis.
 Dr. Dermot Melick, Phoenix, Arizona
 Dr. John Mendenhall, Madison, Wis.
 Dr. Bertrand Meyer, Los Angeles, Calif.
 Dr. and Mrs. James Neller, Los Angeles, Calif.
 Dr. John Pellett, Madison, Wis. and his father
 Dr. Thomas Pellett from New Jersey.
 Dr. Paul Skudder, New York City
 Dr. Thomas Way, Madison, Wis.
 Dr. and Mrs. Eugene Weston, Air Force Academy, Colorado Springs, Colorado
 Dr. William Young, Madison, Wis.
 Dr. Robert Hickey, Madison, Wis.
 Dr. and Mrs. Flavio Puletti, Madison, Wis.

Plans were made at this meeting for a second union in October 1964 in association with the American College of Surgeons meeting in Chicago. Dr. John Keeley will act as local host.

Very sincerely yours,
 Kenneth E. Lemmer, '30 (Signed)

Annual Auditors Report

CPA Warren Randy has submitted the annual audit report for the Medical Alumni Association. In it, Mr. Randy states:

"In my opinion all the disbursements were appropriate to the purposes of the corporation as outlined in the Articles of Incorporation and as promulgated by the Board of Directors."

The report:

UNIVERSITY OF WISCONSIN
MEDICAL ALUMNI ASSOCIATION, INC.

Madison, Wisconsin
