- **Current Version:**
  http://uwdcc.library.wisc.edu/resources/efacs/efacsimile.sgml.shtml

Names of data elements from *UW–Madison Digital Library Data Dictionary: Electronic Facsimiles* are enclosed in [square brackets].

**SGML File**

```xml
<tei.2 id="[Collection-ID].[Aggregate-Sequence-No].[Issue-Sequence-No]" n="[Issue-Printed-No]">
<fileDesc>
<titleStmt>
<title type="245" level="[Issue-Title-Level]" rend="nfc:[Issue-Title-NFC]">[Issue-Title]: electronic facsimile</title>
<author>[Issue-Author]¹</author>
<author>[Issue-Author]²</author>
<editor>[Issue-Editor]²</editor>
<respStmt>
<resp>Submitter</resp>
<name>[Issue-Submitter]</name>
</respStmt>
</titleStmt>
<publicationStmt>
<publisher>University of Wisconsin–Madison Libraries</publisher>
<pubPlace>Madison, Wisconsin</pubPlace>
<idno type="Issue-Printed">[Issue-Printed-No]</idno>
<idno type="Issue-ID">[Collection-ID].[Issue-ID]</idno>
<availability><p>[Issue-Availability]¹</p></availability>
<date>2000-11-06</date><!-- use build date? -->
</publicationStmt>
</fileDesc>
</teiHeader>
</tei.2>
```

---

For further information, refer to the [UW–Madison Digital Library Data Dictionary: Electronic Facsimiles](http://uwdcc.library.wisc.edu/resources/efacs/efacsimile.sgml.shtml).
1* If multiple values are specified in the source field, they will be delimited by a pipe character and space ("| "). In this event, multiple TEI elements should be created, one for each value.

2* If no value is supplied for Issue-Availability, use the value of Collection-Availability instead. If there are multiple values, put each in a separate <p> within a single <availability> element.

3* The data elements Issue-Std-No and Item-Std-No consist of two subelements, type and value, that will be concatenated into a semicolon-delimited string. This will have to be parsed at build time, and the subelements should be used as shown here.

4* Values for the type attribute should correspond to those of Aggregate-Title-Level:

<table>
<thead>
<tr>
<th>Aggregate-Title-Level</th>
<th>Type attribute</th>
</tr>
</thead>
<tbody>
<tr>
<td>s</td>
<td>440</td>
</tr>
<tr>
<td>m, u</td>
<td>245</td>
</tr>
<tr>
<td>j</td>
<td>772</td>
</tr>
</tbody>
</table>

5* When a figure entity is reused, e.g. because of a mid-page Item (<div1>) break, a page break element should not be generated along with the repeated figure.

6* If no value is supplied for Page-Description, use the default value Page image.

7* A <bibl> should be created only for those Items whose Item-Type is "Article" or "Work".
